Southern European rooftop solar panels

Overview

What is the rooftop solar PV comparison update?

The Rooftop Solar PV Comparison Update produced by CAN Europe and eco-union, with contributions from our members, is an updated version of the Rooftop Solar PV Comparison Report published by CAN Europe in May 2022.

How much solar power does Europe have in 2024?

The bulk of EU solar power comes from building installations, which make up around two-thirds (over 220 GW) of current EU solar capacity. Despite a recent slowdown in the rooftop segment, it still provided close to 60% of Europe's newly installed solar capacity in 2024, and the prominence of rooftop solar is unlikely to change in the foreseeable.

Will the EU mandate rooftop solar in 2027?

The EU is currently considering a similar mandate for all its 27 member nations, in the form of an amendment to the Energy Performance of Buildings Directive. In Brussels, the European Commission proposed obligatory rooftop solar on commercial and public buildings by 2027, and for residential buildings by 2029.

Will rooftop solar change in 2024?

Despite a recent slowdown in the rooftop segment, it still provided close to 60% of Europe's newly installed solar capacity in 2024, and the prominence of rooftop solar is unlikely to change in the foreseeable. The immovable truths of versatility, affordability, and energy security will help the segment weather headwinds.

Are solar panels mandatory in Europe?

In Europe, about half of all 27 EU members states either have a mandate of some sort in place or one that is going into effect in the near future. At present, Belgium (Flanders), the Netherlands, and Switzerland oblige all

existing buildings to have solar panels – photovoltaic or thermal – covering all or part of the roof.

Are EU member states facilitating rooftop solar deployment?

The report examines EU Member States (Bulgaria, France, Germany, Greece, Italy, Latvia, Lithuania, Portugal, Romania, Spain and Sweden) on their good and bad practices when it comes to facilitating rooftop solar deployment in the EU.
