Overview

What is the design and construction of a fire and emergency services station?

The design and construction of a fire and emergency services station is a long and complicated process. Many different decisions are required, and different people may be involved in those decisions. The factors governing facility design vary from department to department, and even within the organization itself.

Can a contractor build an emergency response station?

It must be understood that the design and construction of emergency response facilities is a once-in-a-lifetime occurrence for many communities. Larger organizations also have frequent turnover in personnel assignments, and there is little continuity from the design and construction of one facility to the next. a contractor can build the station.

Who owns an EMS agency?

These EMS agencies may be owned privately or publicly. They may be operated by municipal governments, corporations, colleges, industry, volunteer organizations or by hospitals. The area serviced by the agency may be an entire county a town or an industrial complex.

Should a fire and EMS Station serve as a model?

In each of these areas, the fire and EMS station should serve as the model for the community. As with any public or private facility, fire and emergency services stations are subject to theft, vandalism and violence. For staffed stations, these acts are most likely to occur when emergency response personnel are on a call.

What are the requirements for a EMS Bay?

A specific need within this general need is to provide a bay capable of housing two apparatus and an EMS vehicle. As will be explained in later sections, there

are several factors to be considered. The building committee or other responsible group must clearly define these needs and, where possible, quantify their requirements.

Should EMS be compatible with a local hospital?

For EMS service, it may also be important to consult with the local hospital for compatibility between the department and hospitals to enhance the responsiveness of both facilities. If the station is permanently staffed, then station occupant comforts should be addressed.
