Overview

What is the market energy storage in Spain?

The market energy storage in Spain, particularly in relation to the BESS systems (Battery Energy Storage Systems), is undergoing a dynamic and accelerated evolution. This transformation is driven by the growing need to integrate renewable energy sources into the electricity grid, improve supply stability and optimize energy use.

How does Spain support the development of energy storage?

To support this growth, Spain has implemented several policies and regulations that encourage the development of energy storage. The Energy Storage Strategy 2030, promoted by the Ministry for the Ecological Transition and the Demographic Challenge, is one of the key initiatives. This strategy aims to achieve a storage capacity of 20 GW by 2030.

Why is energy storage a problem in Spain?

Despite having a clear strategy and ambitious goals in the sector of energy storage in Spain, subsidies and direct aid specific to these technologies remain limited. This creates a significant barrier for companies and individuals interested in investing in energy storage solutions.

What is E1 thermal storage in Spain?

E1 thermal storage Solar thermal power is another emerging technology in Spain, especially in the context of solar thermal power plants. This method allows heat to be stored in the form of thermal energy to be converted into electricity during the night or during cloudy periods.

What is the European Commission's new energy storage support scheme?

The European Commission approved a new support scheme. It targets large-scale energy storage projects in Spain. It focuses on technologies like standalone battery energy storage systems (BESS), pumped hydro energy

storage (PHES), and thermal energy storage.

What is EI energy storage?

EI energy storage is a fundamental part of the transition towards more sustainable energy. In Spain, various technologies are emerging and evolving to meet the needs of renewable energy storage. Below, we explore some of the main technologies used in energy storage:
