String inverter price

Overview

How much does a solar inverter cost?

You won't be able to use the electricity generated by your solar panels without a solar inverter. A solar inverter costs \$2,000 on average, with prices ranging from \$800 to \$5,000 —though the overall price is wrapped up in your solar panel installation. The size of your system, the type of inverter, and the efficiency rating affect your final cost.

How much does a string inverter cost?

String inverters cost \$800 to \$2,500 on average. Most homes only require a single inverter, but you could need up to three if you have a larger-than-average residential solar energy system. String inverters work by connecting several solar panels, which send their electricity to a central point where the inverter converts the power.

What is a string inverter?

A string inverter is a central unit with inputs for strings (groups) of solar panels. In string inverter systems, solar panels are chained together in series, with the final panel in the chain plugging into an input on the inverter. For example, a kit may be designed with two strings of 8 panels apiece, for a total of 16 panels.

Are string inverters a cost-effective solution for a home solar installation?

String inverters are the most cost-effective solution for a home solar installation. For homes without any shading issues, string inverters provide a quick and easy solution to install solar. Each kit comes complete with tier-1 solar panels, a grid-tie string inverter, Ironridge racking, and free system monitoring.

Are string inverter kits available for roof mounted systems?

*String inverter kits are generally not available for roof mounted systems due

to National Electrical Code standards. A string inverter is a central unit with inputs for strings (groups) of solar panels. In string inverter systems, solar panels are chained together in series, with the final panel in the chain plugging into an input on the inverter.

Where can I buy DIY solar panels with string inverters?

Shop DIY solar panel kits with string inverters from GoGreenSolar. They come with mono solar panels, racking, attachments, and free monitoring.
