Sudan s Energy Storage Industry Planning Scheme

Overview

Is Sudan's Energy Sector Sustainable?

Further, Sudan's energy sector is currently subsidised by the government. Government subsidies to the sector totalled \$667 million in 2019. This represents 13.5% of total government expenditures . Financial sustainability could be achieved by introducing gradual tariff adjustments.

How can Sudan restructure its energy sector from Morocco?

One of the most useful strategies Sudan can adopt from Morocco is the use of new legislation and new policies to restructure the energy sector. This recommended adjustment could encourage future investments targeting renewable production and attract more foreign and local investors to participate in renewable production projects.

How much does electricity cost in Sudan?

As for Ethiopia, Sudan imports electricity at a price of 4.5 cents/kilowatt . In August 2021, the Minister of Energy and Petroleum declared that the Sudanese energy sector needed urgent maintenance and restructuring at a cost of \$3 billion, another indicator of the dire financial needs of the sector .

What are the energy production resources in Sudan?

More than 96% of this capacity was derived from fossil fuels and hydropower; the rest was dependent on RE, viz., solar and biomass . The country started to increase its production from solar resources, leading to an increase in capacity from 14 MW in 2019 to 18 MW in 2020. shows the breakdown of energy production resources in Sudan.

Can Sudan maximize its energy resources?

The analysis reveals promising indicators of Sudan's ability to maximize its solar, wind, and geothermal energy resources. It also presents conclusions and recommendations concerning the future of RE policies and production in

Sudan.

How did the independence of South Sudan affect energy security?

The independence of South Sudan resulted in the loss of 75% of the Sudan's oil reserves and 25% of its hydropower capacity . The decrease in energy supplies, combined with increased demand bolstered by a growing population, threatened Sudan's energy security and contributed to its current energy crisis .
