Swedish High-Frequency Inverter Device

Overview

What is a frequency inverter?

Frequency inverters are electronic devices that let you control the speed of an AC motor. Background: If electric motors or AC motors are operated directly from an AC voltage supply system, they can only avail of a fixed speed based on the number of poles and the supply frequency of the power supply system on location.

What is a Nord frequency inverter & motor starter?

NORD Frequency Inverters and Motor Starters are ideal both for centralised operation in a control cabinet as well as for decentralized, fully integrated use directly on the motor. The inverters are Industry 4.0 ready, can be networked and with the internal PLC enable pre-processing of internal status data or data from externally connected sensors.

What is the best frequency inverter for your application?

Decide for yourself, what is the best for your application. NORD Frequency Inverters already meet the requirements of energy efficiency classification IE2 of the new Ecodesign directive (EU) 2019/1781 (valid from 1st of July 2021). NORD's innovative Drive Technology range can be configured to match almost all applications.

Why should you choose a Nord frequency inverter?

The Frequency Inverters provide extensive integrated safety and monitoring functions. Global As a NORD customer you benefit from a wide range of services, e.g. global support for planning and commissioning of your system as well as sales partners on all continents.

.

Does nordac Link offer a frequency inverter?

Within the NORDAC LINK family we also offer a corresponding Frequency Inverter with integrated PLC, which optimally provides functions close to the drive. Find out more about NORDAC *LINK* Motor Starters. Frequency inverters and motor starters from NORD DRIVESYSTEMS operate quickly, reliably and safely.
