Swedish energy storage fire protection system manufacturer

Overview

What role does battery storage play in Sweden's energy infrastructure?

This increase underscores the growing role of battery storage systems in stabilising and supporting Sweden's energy infrastructure. Swedish Solar Energy launched version 1.1 of its fire protection guideline for stationary battery storage systems on October 29, 2024.

Can a stationary battery storage system be installed in Sweden?

Svensk Solenergi has shared new guidelines for installing stationary battery storage systems. Its publication comes as the number of battery installations in Sweden, across both the residential and larger-scale markets, is accelerating.

What is Sweden's largest energy storage investment?

Sweden's largest energy storage investment to date, a 14-site project totalling 211 MW/211 MWh, came online last month. This content is protected by copyright and may not be reused. What are Svensk solenergi's fire safety guidelines?

The guidelines, which cover both small and large-scale installations, were created in collaboration with Svensk Solenergi's member companies and the Swedish Fire Protection Association. "With this guideline, we want to make it easier for players in the industry to work safely and sustainably," said Anna Werner, CEO of Svensk Solenergi.

What industries does Firefly protect?

Firefly protects industrial processes all over the world, in sectors such as woodworking, wood panel manufacture, paper, tissue, absorbent materials, food industry, ports, power plants, biofuel manufacture and the recycling industry. The key to productivity in any continuous process is to avoid

downtime.

How does a fire protection system work?

In addition to controlling the automated extinguishing system, the fire protection system triggers all other necessary battery management system control functions. As its name implies - "aspirated" smoke and off-gas detection systems use an "aspirator" mounted in a detector unit.
