# Swiss Smart Energy Storage Solutions Company

## Overview

---

What is a lithium battery storage & energy management system?

With our upcycled lithium battery storage & energy management system, you can leverage the power of renewables to mitigate costs and decarbonize your business. Our BMS-certified, fire-protected commercial energy storage systems help energy-intensive sectors like agriculture, logistics, recycling and manufacturing meet their ESG commitments.

Why should you choose ESS power storage solutions?

All solutions are fully modular and scalable. High-power reused cells save 196 kg CO<sub>2</sub> per kWh, certified by KIWA. Our ESS solutions are designed for easy installation and seamless integration into new or existing power systems. We offer power storage solutions for industry clients such as energy suppliers.

Why do we need Smart Storage?

Smart. Effective. Integrated. Energy is increasingly delivered on demand. That's why we have to store it when we don't need it, release it during peak consumption, and balance its generation across the grid. CSEM is creating smart storage technologies to tackle the main challenges of battery technologies: charging time, lifespan and range.

What is battery energy storage systems-as-a-service?

ABB today announced the launch of its new Battery Energy Storage Systems-as-a-Service (BESS-as-a-Service) – a flexible, zero-CapEx solution designed to accelerate the shift to clean, resilient and affordable energy.
