# The feasibility of flow battery energy storage

## Overview

---

Their ability to deliver long-duration storage, provide stable discharge cycles, and ensure enhanced safety compared to conventional lithium-ion technologies makes them a preferred choice for large-scale renewable energy integration and grid balancing.

Their ability to deliver long-duration storage, provide stable discharge cycles, and ensure enhanced safety compared to conventional lithium-ion technologies makes them a preferred choice for large-scale renewable energy integration and grid balancing.

The objective of SI 2030 is to develop specific and quantifiable research, development, and deployment (RD&D) pathways to achieve the targets identified in the Long-Duration Storage Shot, which seeks to achieve 90% cost reductions for technologies that can provide 10 hours or longer of energy.

The global flow battery energy storage market size was estimated at approximately USD 38.34 million in 2024 and is projected to reach USD 338.87 million by 2033, growing at a CAGR of 27.05% from 2025 to 2033. The increasing need for large-scale, long-duration storage solutions to stabilize.

The grid needs scalable, cost-effective long-duration energy storage and flow batteries are emerging as the answer. In this forward-looking report, FutureBridge explores the rising momentum behind vanadium redox and alternative flow battery chemistries, outlining innovation paths, deployment.

MADISON, Wisc.-- (BUSINESS WIRE)-- Flux XII, Inc., a next-generation energy storage company developing advanced materials for aqueous flow batteries, announced today the raise of \$3.95 million SEED funds. The round was led by The Grantham Foundation for the Protection of the Environment with.

Ali Tuna from Modern Battery (MoBat) Group of the University of Turku in Finland introduces a new neutral-pH flow battery that tackles Europe's energy storage and materials dependency challenges - offering a safer, scalable alternative to vanadium systems. Europe is undergoing the fastest energy.
