

Kongres Container

The largest battery cabinet company in Honduras

Overview

This wake-up call revealed why Honduras enterprise energy storage isn't just tech jargon – it's the difference between cold beers and melted ice cream during peak hours.

This wake-up call revealed why Honduras enterprise energy storage isn't just tech jargon – it's the difference between cold beers and melted ice cream during peak hours.

In November 2024, Honduras made waves with its 75MW/300MWh battery storage tender – the energy equivalent of building a 4-hour power bank for 75,000 Honduran households [1]. Fast forward to March 2025, and China's Windey (赢德) teamed up with Spain's Equinsa to clinch the \$50.2 million contract.

The National Electric Power Company (ENEE) has selected a Chinese-Honduran consortium to design, supply, install, test, and commission a grid-connected battery energy storage system (BESS) at the Amaratoca substation in the department of Francisco Morazán. Honduran state-owned utility ENEE has.

Recently, Windey, in collaboration with EQUINSA, a local Honduran power company, successfully won the EPC turnkey contract for Honduras' first energy storage project—the Honduras Energy Storage Project—marking a critical breakthrough of "first bid, first win" in its international energy storage.

The main ESS (energy storage system) categories can be summarized as below: Potential Energy Storage (Hydroelectric Pumping) This is the most common potential ESS — particularly in higher power applications — and it consists of moving water from a lower reservoir (in altitude). Solar

Integration:.

autifully designed turnkey solution for energy storage system. The commercial solar battery st hat has been designed specifically for demanding environments. The robust IP54 rated cabinet provides environmental protection from harsh applications where dust and humidity co ld severely impact system.
