

## Kongres Container

# Thin-film solar microinverter

## Overview

---

Thin-film solar cells are a type of made by depositing one or more thin layers (or TFs) of material onto a substrate, such as glass, plastic or metal. Thin-film solar cells are typically a few nanometers ( ) to a few microns ( ) thick—much thinner than the used in conventional (c-Si) based solar cells, which can be up to 200  $\mu\text{m}$  thick. Thi.
