Tonga solar Energy Storage Project

Overview

A solar-plus-storage project combining 300kW of PV and a 2MWh battery energy storage system (BESS) has been installed in the Polynesian archipelago nation of Tonga. The project on the island of Vava'u was commissioned by Tonga Power Limited (TPL), the country's sole electric utility.

The two battery storage facilities installed in Tonga are complementary: the aim of the first 5 MWh / 10 MW battery is to improve the electricity grid's stability (regulating the voltage and frequency), while the second 23 MWh / 7 MW battery is designed to transfer the electrical load in order to.

This review of the Tonga Outer Island Renewable Energy Project (OIREP) was commissioned by the Australian High Commission to Tonga. The review was led by Scott Rankin, with support from Renewable Energy expert Rob Passey of ITP Renewables. We would like to thank the many people who gave generously.
