# Tonga solar Power Station System

## Overview

---

The Sunergise 6 MW IPP Solar Generation Systems is a in , , . It is the largest photovoltaic power plant in South Pacific.

Tonga Energy Road Map Plus 2025, aims to achieve 70% of renewable energy share in electricity generation. The recent installation of solar mini-grid systems on three remote islands in Tonga: Niuafou'ou, O'ua, and Mo'unga'one.

Tonga Energy Road Map Plus 2025, aims to achieve 70% of renewable energy share in electricity generation. The recent installation of solar mini-grid systems on three remote islands in Tonga: Niuafou'ou, O'ua, and Mo'unga'one.

There are roofs all over the islands that could become renewable energy generators, and a huge opportunity for growing solar for our community. We're excited to be leading the charge and partnering with Tonga Power Limited to help get there and proud to be helping Tonga gain access to energy that.

The Tonga Outer Island Renewable Energy Project (OIREP) will construct Solar Photovoltaic (PV) power plants on 8 outer islands. The "on-grid" portion will be allocated to Ha'apai and 'Eua, while the "off-grid" portion will incorporate 'Uiha, Nomuka, Ha'ano, Ha'afeva, as well as Niuatoputapu and.

Tonga is making tangible progress toward its renewable energy targets with the rollout of solar-powered mini-grid systems across its outer islands, in a bold move to reduce its dependence on expensive diesel imports and improve electricity access for remote communities. Currently, around 91 per.

In the presence of Their Majesties King Tupou VI & Queen Nanasipau'u, The King & Queen of The Kingdom of Tonga, Tonga's new 6MW solar power plant was officially launched today at Fualu, Tongatapu by Prime Minister of the Kingdom of Tonga, Hon. Hu'akavameiliku. Implemented by New Zealand company.

The Sunergise 6 MW IPP Solar Generation Systems is a photovoltaic power plant in Kolovai, Tongatapu, Tonga. It is the largest photovoltaic power plant in South Pacific. The power purchase agreement between Sunergise New Zealand and Tonga Power Limited with the support of Asian Development

Bank was.

Tonga Energy Road Map 2010 launched as a 10-year plan focused on reducing Tonga's vulnerability to oil price fluctuations and improving access to modern energy services, and achieving environmental sustainability. National Energy target by 2020, 50% of renewable energy (Solar and Wind) share on. What is a solar farm & how can it help Tonga?

Producing energy since August this year, and providing power for up to 10,336 households, the Solar Farm is helping The Government of Tonga pursue its National Energy Roadmap plans to see up to 70% of Tongatapu's electricity generation sourced from renewables by the end of 2025.

Why do we need solar power in Tonga?

Renewables like solar are a significant means for Tonga to expand energy access, stabilize power grids as well as reduce pollution. Considering the shortage of solar expertise and finances for countries like Tonga, the role of independent power producers and the practice of PPA provide solid support to smooth the way for solar deployment.

What does Sunergise's 6MW solar system mean for Tonga?

As Hu'akavameiliku, Prime Minister of Tonga said at the ceremony: "The successful completion of the Sunergise's 6MW Independent Power Producer solar generation system today, demonstrates the major role renewable energy independent power producers play towards achieving our 70% target by [the] end of [the] year 2025."

Who are Sunergise New Zealand & Tonga Power Limited?

This solar project was completed under the partnership between Sunergise New Zealand Limited and Tonga Power Limited with support from the Asian Development Bank (ADB). Sunergise led the construction and meanwhile united local Tongan civil, mechanical and electrical sub-contractors to the team.

Can Australia help secure Tonga's outer island energy needs?

Australia also has a long history of engagement in relation to helping secure Tonga's outer island energy needs. In the early 2000s, Australia funded the Ha'apai Outer Islands Electrification project (HOIEP), which involved the installation of diesel-powered generators and electrical reticulation on four

islands in the Ha'apai group.

How many people have access to electricity in Tonga?

This means that little more than 30,000 people are spread across 35 islands, presenting acute issues in terms of the provision of modern infrastructure. At OIREP commencement, the ADB estimated that 89% of all households across Tonga had access to electricity.
