# Two strings of pack batteries

## Overview

---

Can a lithium ion battery pack have multiple strings?

Whenever possible, using a single string of lithium cells is usually the preferred configuration for a lithium ion battery pack as it is the lowest cost and simplest. However, sometimes it may be necessary to use multiple strings of cells. Here are a few reasons that parallel strings may be necessary:

What if there are only two batteries in a parallel string?

If there are only two batteries in the parallel string, we would then take a cable from the POS. (+) terminal of Battery 1 to the charger. We would use the POS. (+) terminal of Battery 2 for connection to the loads.

How many volts is a battery pack?

Again, the total battery pack voltage is 24 volts and that the total battery pack capacity is 40 amp-hours. NOTE: The following diagrams show some ways to connect Battery Tender battery chargers to various battery packs connected in series and parallel. One Battery, One Charger, One Voltage.

What is a parallel lithium battery pack?

According to the parallel principle, the current of the main circuit is equal to the sum of the currents of the parallel branches. Therefore, a parallel lithium battery pack with “n” parallel batteries achieves the same charging efficiency as a single battery, with the charging current being the sum of the individual battery currents.

What is a lithium battery pack?

A lithium battery pack is a combination of individual lithium-ion cells. These cells work together to provide the necessary power for various applications. How these cells are connected—whether in series, parallel, or a combination of both—determines the overall voltage and capacity of the battery pack.

How do Battery strings work in a parallel set?

Note: Energy from the battery is always sourced from the system of the lowest impedance. This is why the strongest battery string provides the power first and when it becomes depleted less than another string, that one then takes over. In a parallel set, they work in unison to balance each other out.
