# Unit price of hybrid energy service for telecommunication base stations in Finland

## Overview

---

What is a hybrid energy storage system?

Hybrid energy storage systems using battery energy storage has evolved tremendously for the past two decades especially in the area of car manufacturing either in a fully hybrid electric car or hybrid car that use battery energy storage with internal petrol combustion engine .

How many MW of Finnish electricity will be available in 2023 - 2024?

However, the entire capacity is not available during the peak load periods. The Energy Authority has estimated in autumn 2023, that 12,800 MW of Finnish electricity generation capacity will be available during the consumption peaks in winter 2023-2024. The Energy Authority estimated also that peak load will be 14,300 MW for the same period.

What is unique about this research based on hybrid energy storage?

The interesting or unique about this research compared to other research-based on hybrid energy storage is to apply hybrid energy storage in the poor grid and bad grid scenarios which are not discussed in another research before.

Are hybrid BTS sites good for Pakistan's telecom industry?

Hybrid BTS sites are, therefore, more economical and environmentally friendly regarding worries about global warming and long-term system functioning with no pollution. In conclusion, building improved BTS sites has positive technical, environmental, and financial effects on Pakistan's telecom industry.

Will Ter-Minal tariffs be applied to off-grid LNG terminals in Finland?

As all off-grid LNG terminal projects in Finland have received state-aid, European Commission has requested that the regulation concerning the 3rdparty access and ex-ante approval of terminal tariffs shall be applied to those LNG terminals. This concerns also off-grid terminals. Tariffs are in force

for a maximum time span of two years at once.
