Vatican officials have estimated it will cost under 100 million euros (\$114 million) to develop the solar farm, and that once it is approved by the Italian parliament, the contracts to do the.

ROME (AP) — Italy agreed Thursday to a Vatican plan to turn a 430-hectare (1,000-acre) field north of Rome, once the source of controversy between the two, into a vast solar farm that the Holy See hopes will generate enough electricity to meet its needs and turn Vatican City into the world's first.

With the Apostolic Letter "Fratello sole," issued motu proprio, Pope Francis provides for the construction of an agrivoltaic plant in the extraterritorial zone of Santa Maria in Galeria, where Vatican Radio maintains antennas for digital broadcasting. By Christopher Wells Highlighting the need "to.

efficiency and wattage of the panels used. Annual Energy Production: 27,000 kWh: Average Cost of Electricity: \$0.13 per kWh: Annual Savings: \$3,510: System Cost (After ITC) \$35,150 (average) Payback Holy See's property at Santa Maria di Galeria. Located on the edge of Rome, the 424-hectare wer.

Any excess electricity generated by the farm beyond the Vatican's needs would be given to the local community, officials said, speaking on condition of anonymity because the agreement was not public. Vatican officials have estimated it will cost under 100 million euros (\$114 million) to develop the.

On July 31, at the historic Palazzo Borromeo, the Holy See and the Italian Republic signed a landmark agreement to build an agrivoltaic system in Santa Maria di Galeria. Photo: Vatican Media According to the Vatican's press office, the installation will apply the most advanced solutions currently.

Pope Francis has given orders to construct the agrivoltaic plant (the land will be used both for agriculture and solar panels) in the area Santa Maria di

Galeria, the 424-hectare site where Vatican Radio installed the broadcasting equipment, thanks to a 1951 agreement between the Holy See and the.
