

Kongres Container

Venezuela energy storage liquid cooling container manufacturer

Overview

What is a 5MWh liquid-cooling energy storage system?

The 5MWh liquid-cooling energy storage system comprises cells, BMS, a 20'GP container, thermal management system, firefighting system, bus unit, power distribution unit, wiring harness, and more. And, the container offers a protective capability and serves as a transportable workspace for equipment operation.

What is a containerized energy storage system?

The containerized energy storage system offers grid services such as peak shaving, load shifting, and frequency regulation. The modular nature of BESS containers allows for flexible capacity expansion and easy installation at commercial and industrial sites. How Does the Containerized BESS System Work?

.

What is a liquid cooling thermal management system?

The liquid cooling thermal management system for the energy storage cabin includes liquid cooling units, liquid cooling pipes, and coolant. The unit achieves cooling or heating of the coolant through thermal exchange. The coolant transports heat via thermal exchange with the cooling plates and the liquid cooling units.

What is a liquid cooling unit?

The product installs a liquid-cooling unit for thermal management of energy storage battery system. It effectively dissipates excess heat in high-temperature environments while in low temperatures, it preheats the equipment. Such measures ensure that the equipment within the cabin maintains its lifespan.

What is a HJ-ESS-desl battery container?

The HJ-ESS-DESL series BESS container with a capacity of 372 - 1860 kWh utilizes advanced liquid-cooling technology to maintain the best temperature for all the battery modules. These liquid-cooled BESS systems assure maximum efficiency and longer battery life than conventional systems.

What is a liquid cooled Bess container?

Our liquid-cooled BESS container utilizes proprietary thermal regulation technology to maintain cell temperature difference within $\leq 2^{\circ}\text{C}$ (refer to HJ-ESS-DESL technical white paper).
