

## Kongres Container

# Western European battery energy storage project construction

## Overview

---

How many battery energy storage systems were installed in Europe in 2024?

21.9 GWh of battery energy storage systems (BESS) was installed in Europe in 2024, marking the eleventh consecutive year of record breaking-installations, and bringing Europe's total battery fleet to 61.1 GWh. However, the annual growth rate slowed down to 15% in 2024, after three consecutive years of doubling newly added capacity.

How can battery storage increase Europe's storage capacity?

ve growth in the battery storage sector, aiming to increase Europe's overall storage capacity. his expansion ensures grid stability, enhances flexibility, and supports the energy transition. Germany's Federal Network Agency projects that large battery storage capac.

How many energy storage projects are there in Europe?

There are 147 energy storage projects under construction in Europe, with a total capacity of 14 GW, according to the European Energy Storage Inventory, launched by the European Commission. The European Energy Storage Inventory comprises operational, under construction, permitted, and announced energy storage projects across Europe.

Is Germany a key market for battery storage in Europe?

ila Clean Energy EMEA in the country. Germany remains a key market for battery storage in Europe. The demand f r energy storage solutions to manage fluctuations in renewable energy generation is accelerating. Projects like Wetzen a essential steps toward meeting this demand and advancing the decarbonisation of the economy."1As a two-hour storage.

What is the Wetzen battery storage project?

integration of renewable energy.Wetzen Project - Expanding Battery Storage Capacity in GermanyKilian Leykam, Director of Energy Storage Commercial at

Aquila Clean Energy EMEA, comments: “Starting construction of the W tzen battery storage project marks another milestone for Aq.

What is the European energy storage inventory?

The European Energy Storage Inventory comprises operational, under construction, permitted, and announced energy storage projects across Europe. A real-time dashboard for energy storage also includes their locations and technologies – chemical storage, electrochemical storage, mechanical storage, and thermal storage.
