

## Kongres Container

# What are the container energy storage backup power supplies

## Overview

---

Containerized Battery Energy Storage Systems (BESS) are essentially large batteries housed within storage containers. These systems are designed to store energy from renewable sources or the grid and release it when required. This setup offers a modular and scalable solution to energy storage.

Containerized Battery Energy Storage Systems (BESS) are essentially large batteries housed within storage containers. These systems are designed to store energy from renewable sources or the grid and release it when required. This setup offers a modular and scalable solution to energy storage.

These Battery Energy Storage Systems (BESS) pack lithium-ion cells, inverters, and thermal controls into portable, standardized units. They're the Swiss Army knives of energy – deployable in hours, scalable, and surprisingly stylish (if industrial chic is your thing).
