What energy stations are there in Slovakia

Overview

Two coal power stations were operated in Slovakia until 2024, with the power station at Nováky closing in 2023, and the power station at Vojany ceasing production in spring 2024. [7][8] Slovakia currently does not have thermal powerplants in operation and relies on nuclear power.

Slovakia has 30 utility-scale power plants in operation, with a total capacity of 6230.9 MW. This data is a derivative set of data gathered by source mentioned below. Global Energy Observatory/Google/KTH Royal Institute of Technology in Stockholm/Enipedia/World Resources Institute/database.earth.

Primary energy use in Slovakia was 194 TWh and 36 TWh per million inhabitants in 2009. [1] Slovakia has a plan to get renewable sources of energy up to 19.2% by 2030. [2] From 2024, following the completion of two new nuclear reactors, Slovakia will return to being a net exporter of electricity.

Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. It represents all the energy required to supply end users in the country. Some of these energy sources are used directly while most are transformed into fuels or.

Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. It represents all. Which power stations are in Slovakia?

What is the main source of electricity in Slovakia?

Nuclear power plants are the main source of electricity production in Slovakia. In 2022, over 59 percent of total electricity generation in the country was derived from this source. By comparison, hydroelectric power plants accounted for 13.7 percent of power production, the most of any renewable source.

How many power plants are in Slovakia?

Slovakia has 30 utility-scale power plants in operation, with a total capacity of 6230.9 MW. This data is a derivative set of data gathered by source mentioned below. Global Energy Observatory/Google/KTH Royal Institute of Technology in Stockholm/Enipedia/World Resources Institute/database.earth.

How much wind power does Slovakia have in 2022?

At the end of 2022, wind power capacity in Slovakia constituted 3 MW, a number that has not changed since 2010. In the National Energy and Climate Plan the Government plans to build 500 MW of wind power by 2030. In 2023 Slovakia had 840 MW of installed solar power capacity.

How much does electricity cost in Slovakia?

The electricity price for businesses is EUR 0.253 kWh or USD 0.291. These

retail prices were collected in September 2024 and include the cost of power, distribution and transmission, and all taxes and fees. Compare Slovakia with 150 other countries. Historical quarterly data, along with the latest update from March 2025 are available for download.

How much energy does Slovakia use?

Primary energy use in Slovakia was 194 TWh and 36 TWh per million inhabitants in 2009. Slovakia has a plan to get renewable sources of energy up to 19.2% by 2030. From 2024, following the completion of two new nuclear reactors, Slovakia will return to being a net exporter of electricity. Slovnaft is the largest oil refinery in Slovakia.
