What is the largest battery energy storage project

Overview

The largest battery storage project in the US is Dynegy Moss Landing Power Plant Hybrid as of November 2025. The project is located in Monterey, CA and has a capacity of 750 MW. Cleanview tracks 10,000+ clean energy projects and 500+ developers in the U.S.

The largest battery storage project in the US is Dynegy Moss Landing Power Plant Hybrid as of November 2025. The project is located in Monterey, CA and has a capacity of 750 MW. Cleanview tracks 10,000+ clean energy projects and 500+ developers in the U.S.

Fullmark Energy quietly shuttered Swiftsure, a planned 650-megawatt energy storage system on Staten Island. The biggest battery project in New York has been canceled in a major victory for the nascent nationwide grassroots movement against energy storage development. It's still a mystery why.

As of November 2025, there are 858 utility-scale battery storage projects in the US, according to Cleanview's project tracker. Their total operating capacity is 37,152 MW. In 2024, there were 183 battery storage projects built in the US. Click any of the links below to jump to a specific section:.
